

Presentation title

Driedubbele ongelijkheden, tussen en binnen landen

1. Ongelijke bijdrage tot emissies
2. Ongelijke gevolgen van klimaatopwarming
3. Ongelijke kost van de klimaattransitie

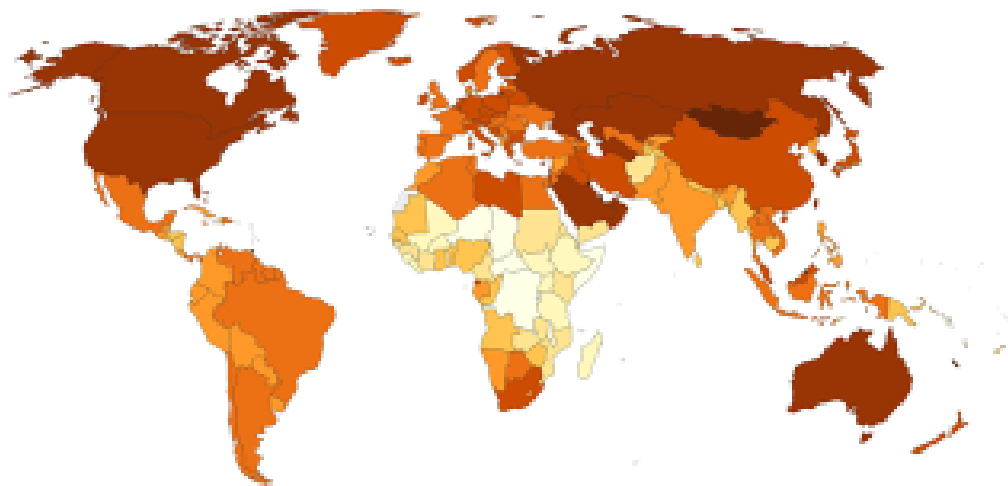

1. Bijdrage tot emissies

Ongelijk tussen en binnen landen

Per capita CO₂ emissions, 2020

Carbon dioxide (CO₂) emissions from the burning of fossil fuels for energy and cement production. Land use change is not included.

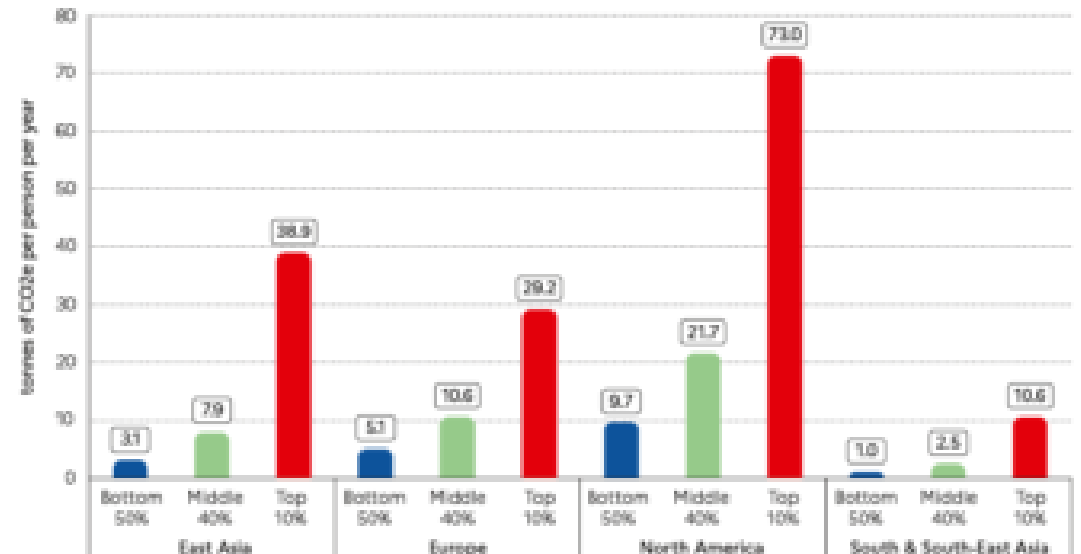

Our World
in Data

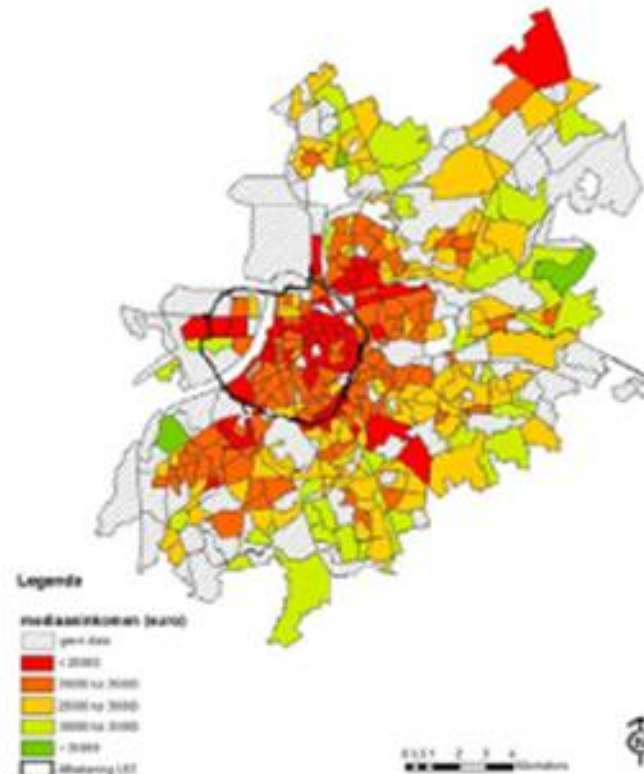

Figure 15 Per capita emissions across the world, 2019

Interpretation: Personal carbon footprints include emissions from domestic consumption, public and private investments as well as imports and exports of carbon embedded in goods and services traded with the rest of the world. Modeled estimates based on the systematic combination of tax data, household surveys and input-output tables. Emissions split equally within households. **Sources and series:** [wir2022.wid.world/methodology](https://ourworldindata.org/methodology) and Charcol (2021).

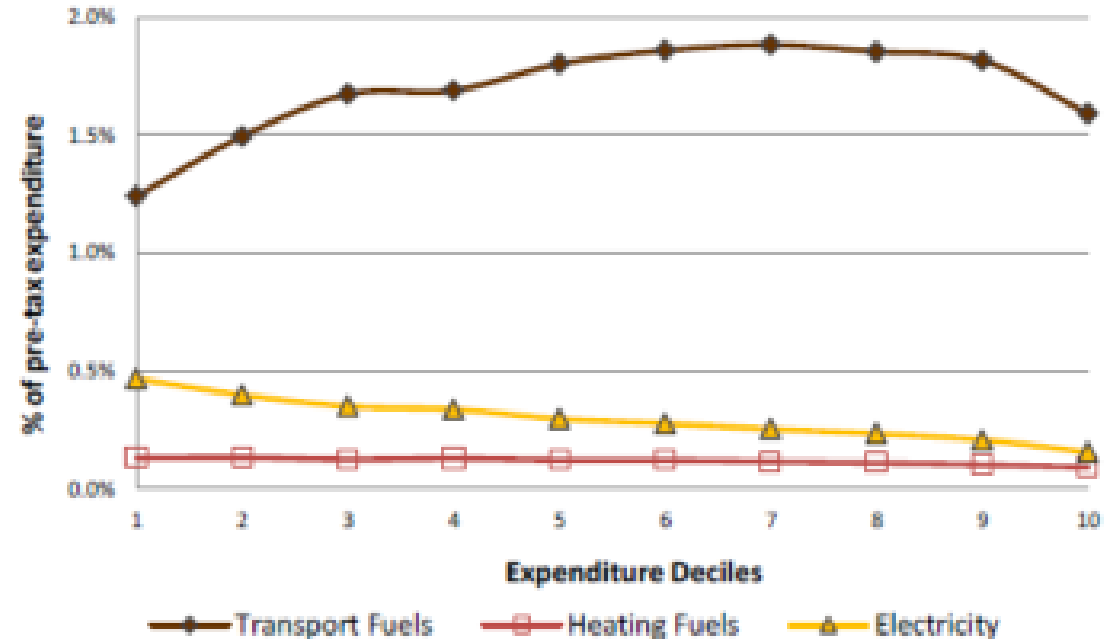

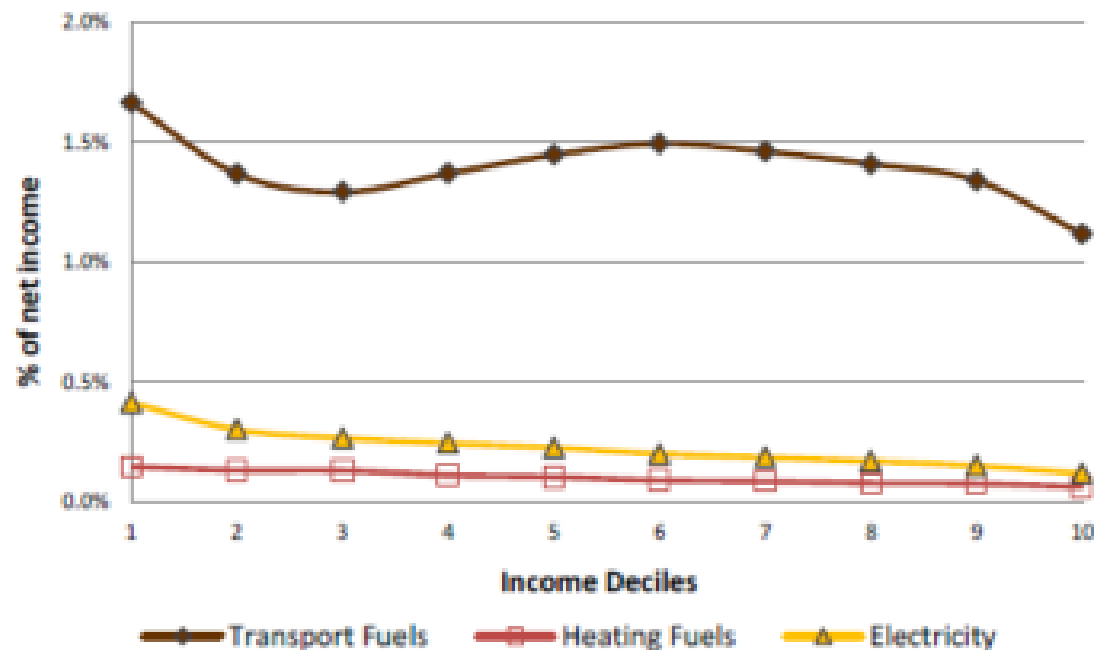

2. Gevolgen van de klimaatopwarming

Ongelijk tussen en binnen landen

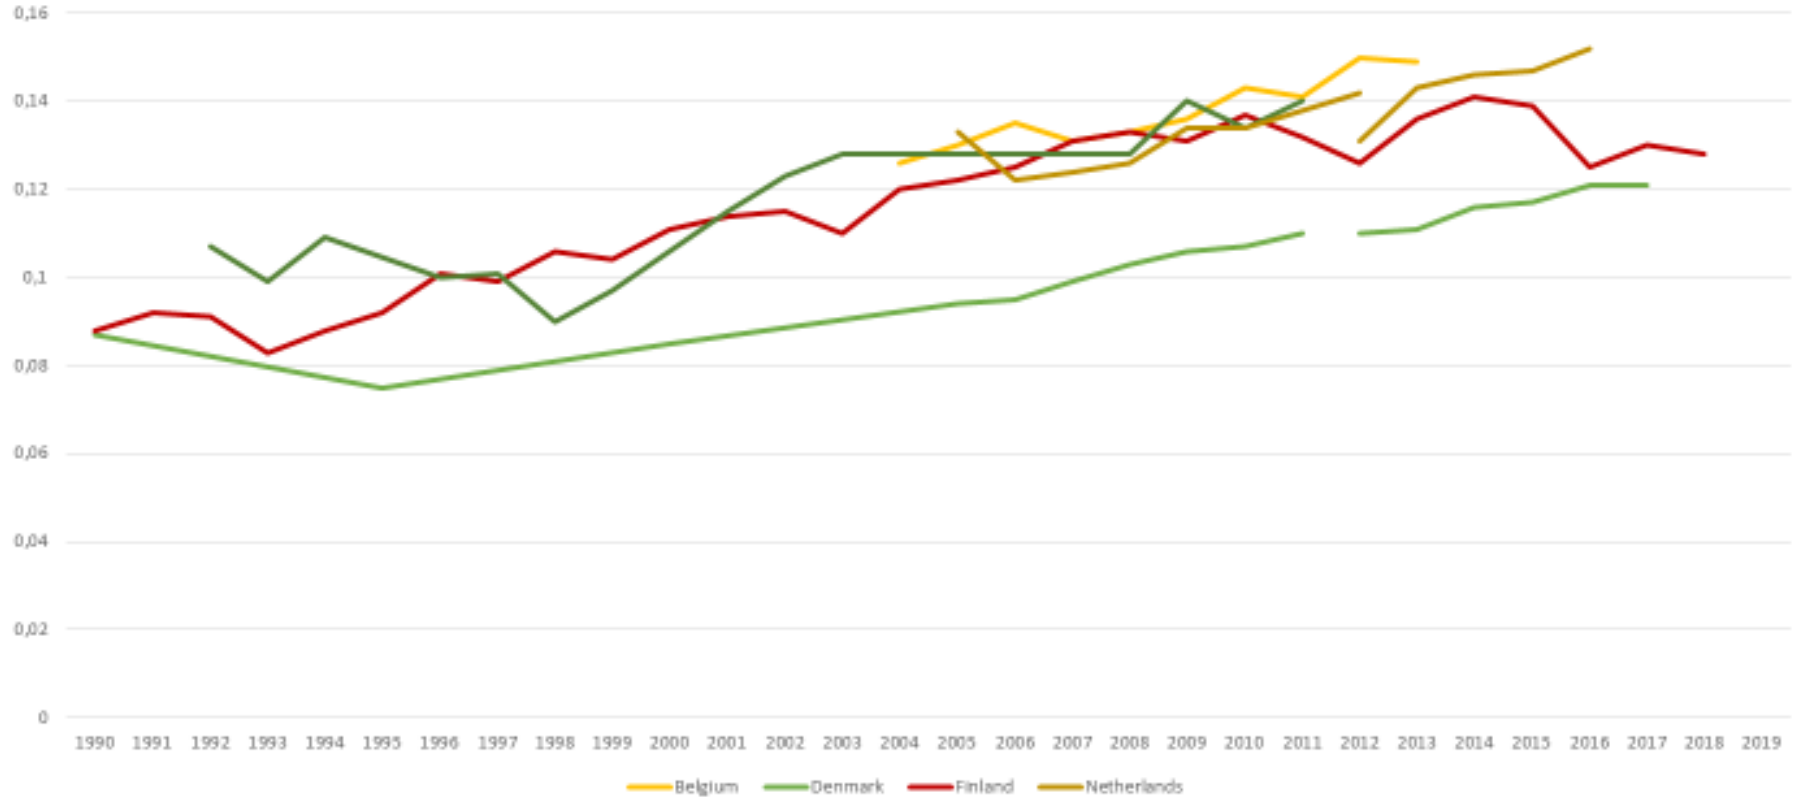

3. Kost van de klimaattransitie

Figure 1. Average taxes on energy carriers as % of net income or pre-tax expenditure (21-country averages)

“ The two great challenges we face are overcoming poverty and managing climate change. If we fail on one, we will fal on the other.”
(N. Stern, 2009)

Monetair armoederisico bevolking op actieve leeftijd , OECD

Sociale zekerheid is minder beschermend geworden , België
